

## igus pops in so you don't need to leave the office

Knowing that time strapped design and engineering teams rarely have the chance to venture out to shows and exhibitions, igus now pops in with products, samples, brochure and catalogues. With its mobile display, igus offers the opportunity for engineers to get to know the products that are interesting for them, at their own premises.

“Each mobile display is tailored to the specific requirements of the engineering team,” explains Chris Foot, sales support, igus. Whether they want to find out more about a self-lubricating plain bearing solution or a reliable energy chain system for their application, the choice is theirs.”

Also, depending on the industry the company operates – anything from Oil & Gas or marine to medical or lighting and stage equipment - appropriate product engineers and industry specialists will be on hand. Products range from low-cost automation systems to self-lubricating and wear-resistant 3D printed gears.

If you and your engineering team would like to arrange a visit, please contact Chris at: [cfoot@igus.co.uk](mailto:cfoot@igus.co.uk) or call igus directly on: 01604 677240

**About igus:**

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 3.800 people around the world. In 2017, igus generated a turnover of 690 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.

The terms igus, chainflex, CFRIP, conprotect, CTD, drylin, dry-tech, dryspin, easy chain, e-chain, e-chain systems, e-ketten, e-kettensysteme, e-skin, flizz, ibow, iglide, iglidur, igubal, manus, motion plastics, pikchain, readychain, readycable, speedigus, triflex, plastics for longer life, robolink and xiros are protected by trademark laws in the Federal Republic of Germany and internationally, where applicable.
