

Video of the week – An overview of everything new in 2018

As the holiday season fast approaches, we take a look back at all the new product introductions this year.

Watching this week's video, it's easy to see why igus remains at the forefront of motion plastics. No matter the application or environment, all igus engineering plastics are lubrication-free and therefore maintenance free.

What's more, igus tribopolymer plastics are made to measure, whether it's a small bearing in a record player or the world's largest plastic energy chain.

On the 'nice list' this year, we have the triflex dresspack configurator, dryspin leadscrew nuts, Ethernet chainflex cables, smart plastics and hygienic design e-chains. Did we miss anything?

About igus:

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 3.800 people around the world. In 2017, igus generated a turnover of 690 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.

The terms igus, chainflex, CFRIP, conprotect, CTD, drylin, dry-tech, dryspin, easy chain, e-chain, e-chain systems, e-ketten, e-kettensysteme, e-skin, flizz, ibow, iglide, iglidur, igubal, manus, motion plastics, pikchain, readychain, readycable, speedigus, triflex, plastics for longer life, robolink and xiros are protected by trademark laws in the Federal Republic of Germany and internationally, where applicable.
