

Video of the Week – How to save time and space with igus readychain module connect

Module connect is a new kind of plug-in connector from igus for connecting different electric cables, fibre optic cables and pneumatic hoses. It's simple, modular design, creates a unique connect/disconnect point with a single module consisting of several different connector inserts. Used as part of a readychain, it connects several cables in the smallest of installation spaces, in one go.

As you can see in this week's video, the housings can then be joined together to create an almost unlimited number of module variations. The low profile saves space, achieves a high contact density. Another advantage is that the integrated honeycomb strain relief system from igus works alongside to ensure secure cable fixation.

Module connect can be adapted to fit any e-chain no matter what the application, whether it's at the fixed end or moving end of an e-chain, between two e-chains or for routing cables into terminal boxes or switch cabinets.

About igus:

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 3.800 people around the world. In 2017, igus generated a turnover of 690 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.

The terms igus, chainflex, CFRIP, conprotect, CTD, drylin, dry-tech, dryspin, easy chain, e-chain, e-chain systems, e-ketten, e-kettensysteme, e-skin, flizz, ibow, iglide, iglidur, igubal, manus, motion plastics, pikchain, readychain, readycable, speedigus, triflex, plastics for longer life, robolink and xiros are protected by trademark laws in the Federal Republic of Germany and internationally, where applicable.
