

Additional sizes added to drylin W exchange range

Motion plastics specialist igus has added new sizes to its drylin W exchange range. In addition to size 10, the liners are available in sizes 16 and 20 for drylin W linear guides. Developed for quick replacement of liners in high-frequency applications, the liner can be replaced directly on the rail without dismantling the system.

The principle of the replacement liner is quite simple: First, the side cover of the linear housing is loosened using a screwdriver. With the free tool supplied, the liner is pushed out of the carriage and removed. The replacement liner, which is made of the wear- and abrasion-resistant iglidur J200 material, is clipped onto the rail and inserted into the carriage with the assembly tool. Put the side cover back on the linear housing and the bearing change is finished in no time.

The practical benefits of the drylin W exchange are that the rail is not damaged, and the carriage can be reused without dismantling ancillaries of the machine. A pin in the middle of the side cover secures the liner in the carriage. Alternatively, replacement can also be carried out with a screwdriver. On the new liner and in the carriage, igus has provided special recesses for this purpose.

The drylin W exchange, with mounting tool, is easy to order online. Just like the practical retrofit kit with replacement liners, lid and mounting tool.

About igus:

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 3,800 people around the world. In 2017, igus generated a turnover of 690 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.
