

Video of the Week – Introducing product highlights from this year’s Hanover Show

With the biggest stand in igus’ history, this year’s Hanover Show unveils a whole host of new products and innovations. In this week’s video, we take a journey around the stand with Artur Peplinski, Vice President of igus.

One of the key highlights in 2019 is the world premiere of RBTX.com - a new platform that brings users and suppliers of low-cost robotics components together quickly and easily. Users can create a low-cost robotics solution that meets their needs and budget.

“Another important building block in our low-cost robotics is the drylin delta robot,” says Peplinski. Available directly from stock as a kit or delivered pre-assembled ready to install, the new, larger drylin delta has a working envelope 10x that of the original version launched last year. As with the previous version, it can be assembled in 30 minutes but has a working space 660mm by 100mm and 30 picks per minute.

A cost-effective, space-saving economy toothed belt drive, the drylin ZLN-40 has a profile height of just 27mm. Also, the new PRT-04 slewing ring bearing is 60% lighter than its predecessor and the installation height has been halved, offering even more design freedom.

“igus is now a member of the PROFINET® user group and a certified supplier for its nine chainflex PROFINET cables,” adds Peplinski. “All igus cables come with a 36-month guarantee, due to extensive testing. For example, the CFBUS.060 has been tested to 59 million cycles.”

About igus:

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 4,150 people around the world. In 2018, igus generated a turnover of 748 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.

The terms igus, chainflex, CFRIP, conprotect, CTD, drylin, dry-tech, dryspin, easy chain, e-chain, e-chain systems, e-ketten, e-kettensysteme, e-skin, flizz, ibow, iglide, iglidur, igubal, manus, motion plastics, pikchain, readychain, readycable, speedigus, triflex, plastics for longer life, robolink and xiros are protected by trademark laws in the Federal Republic of Germany and internationally, where applicable.

All other registered trademarks and trademarks are the property of their respective owners.
