

Video of the Week – How igus technology is keeping the heart of the machine pumping

All over the world, igus clearly contributes towards helping machine builders achieve reliability excellence by providing maintenance-free technology for their equipment to assure maximum uptime. In this week's video, we see readychain systems that are ready-to-connect, with just-in-time delivery to the production line.

Even in particularly aggressive ambient conditions like a high-speed machining centre, energy chain systems prove their reliability. These include twisterband for compact rotational movement, sealed R2.1 energy chains that protect the cables and hoses from dirt and debris and E4.1 e-chains for high density filling and easy assembly.

Also, drylin maintenance-free door mechanisms for reliable and precise adjustment and low-cost automation systems, such as the robolink fully-articulated robotic arm. Last but not least, igus smart plastics are enabling machine builders to implement Industry 4.0 into their equipment for predictive maintenance.

About igus:

Based in Northampton in the UK and with global headquarters in Cologne, Germany, igus is a leading international manufacturer of energy chain systems and polymer plain bearings. The family-run company is represented in 35 countries and employs 3.800 people around the world. In 2017, igus generated a turnover of 690 million euros with motion plastics, plastic components for moving applications.

With plastic bearing experience since 1964, cable carrier experience since 1971 and continuous-flex cable since 1989, igus provides the right solution based on 100,000 products available from stock with between 1,500 and 2,500 new product introductions each year. igus operates the largest test laboratories and factories in its sector to offer customers quick turnaround times on innovative products and solutions tailored to their needs.

The terms igus, chainflex, CFRIP, conprotect, CTD, drylin, dry-tech, dryspin, easy chain, e-chain, e-chain systems, e-ketten, e-kettensysteme, e-skin, flizz, ibow, iglide, iglidur, igubal, manus, motion plastics, pikchain, readychain, readycable, speedigus, triflex, plastics for longer life, robolink and xiros are protected by trademark laws in the Federal Republic of Germany and internationally, where applicable.

All other registered trademarks and trademarks are the property of their respective owners.
